

Post - Care Instructions

Laser Toning

[VRM4, PicoSure, PicoFraxel,
Excel V, Genesis, TheraClear]

You can wash your face and apply makeup on the same day.

Apply sunscreen before going outside – this is essential.

Redness and a warm/burning sensation may last 2–3 hours after treatment.

Some swelling may occur; it will subside naturally. If it persists beyond a few days, contact us.

Skin may feel dry or be prone to breakouts – stay hydrated and moisturize diligently.

Avoid alcohol and smoking for at least 1–2 days, as both increase the risk of inflammation.

Temporary darkening or lightening of the skin may occur but usually resolves on its own.

For any other concerns, contact us via [WA](#) or [DM](#) on Instagram.
